GODPLEX - début feature film releasing to festival premiere 2017

Part-funded by CNZ for music performance and recording. www.godplexmovie.com

Darcy is an inter-media artist with an extensive background in design, photography and music. After working in the communications and advertising industry Darcy migrated to filmmaking, receiving several awards for directing, editing and cinematography. Alongside composing and performing cross-genre music, Darcy has had films screened in a range of festivals. Godplex is his debut feature film, a tragi-comic narrative featuring Shane Hollands, a prominent NZ performance poet and Melbourne artist / actor Marko Maglaic. Written, directed and edited by Darcy, Godplex explores anxiety, delusion and disillusionment and concludes what might be best described as a psychological cinematic interrogation of identity diffusion and the psycho-technological interface.
